Laser Away Cellulite (L.A.)

Just because there's a little dimple action on your tushy doesn't mean it's time to head for liposuction city. Especially when there are more non-invasive options on the market, like the newly launched "No Needle Mesotherapy" treatment at [Melrose Place Aesthetics](#). It's a promising alternative, using just laser technology and electrical waveforms to smooth out lumpy regions, with sessions priced at \$300-\$400. The post-treatment outlook is also favorable: Little to no recovery time and nary a bruise in sight. [8471 Melrose Pl.](#), (323) 658-7855

PICK OF THE DAY

Coach Comforts With Cashmere

Helping to prove once again that it's what's inside that counts, Coach is offering one of winter's must-haves: cashmere-lined gloves. The leather accessories provide all the warmth of chunky-knit mittens, but allow enough flexibility to drive in frosty conditions or grab gloss from your handbag. Go for high-glamour in a peacock-blue pair, or play it safe in black, brown or camel. \$
